Address
554 Buccaneer Street,
Elarduspark, Pretoria

Nationality
South African

Driver's Licence
Code B

CORE SKILLS

- Full-Stack Development
- PHP / MySQL Development
- React / TypeScript
- Database Architecture
- Moodle / LMS Development
- API Integration
- AI / OCR Automation
- Workflow Automation
- Dashboard Development
- Responsive UI / UX

DEVELOPMENT STACK

- PHP
- MySQL / SQL
- JavaScript / TypeScript
- HTML / CSS
- React
- Python
- Java / C#
- Moodle / Edwiser
- Wix / WordPress
- OpenAI API
- Make / n8n
- phpMyAdmin / cPanel
- REST APIs / Webhooks
- Dompdf / PDF Export

EDUCATION

IIE Diploma in IT in Software Development
Varsity College | 2018

Matric
Pretoria Chinese School | 2013

Khawulele Duma Makopi

Software Developer • Database Specialist • AI Developer

PHP / MySQL AI / OCR React / TypeScript Automation Moodle / LMS APIs / Integrations

PROFESSIONAL PROFILE

Software developer and database specialist experienced in designing, building, deploying and supporting production business systems. My work spans PHP/MySQL applications, React/TypeScript interfaces, Moodle learning platforms, gamified learning experiences, database-driven reporting, APIs, automation and AI/OCR document tools. I take systems from requirements and data modelling through development, testing, deployment and operational support, with a strong focus on reliable workflows, clean data and practical business outcomes.

WORK EXPERIENCE

Software Developer / AI Developer | NFMi

June 2024 - Present

- Design and build end-to-end PHP/MySQL business applications covering document management, verification workflows, dashboards, reporting, structured data capture, user permissions and production database integration.
- Develop responsive public websites and internal applications using JavaScript, HTML/CSS and React/TypeScript, translating operational requirements into reusable interfaces and production-ready user journeys.
- Build and administer Moodle learning environments from course architecture through learner onboarding, assessments, progress controls, certificates, custom navigation and production support.
- Developed the MIKS Cubed K53 Learning Portal and DriveQuest practical experience, combining structured K53 learning with quests, XP, achievements, scenario-based practice and Moodle-integrated progression.
- Integrate REST APIs, webhooks, JSON payloads and automation platforms to connect systems, move data between services and replace repetitive manual processing with auditable workflows.
- Develop AI/OCR tools using the OpenAI API for document extraction, summarisation, assessment support and automated report generation, including structured outputs for downstream business use.
- Own deployment and operational support across cPanel, phpMyAdmin, MySQL, domains, SSL, backups and production troubleshooting, including resolving data, application and hosting issues after release.

Database Specialist / Software Developer | RABS Investments

March 2023 - May 2024

- Built and maintained a job-capturing web application that centralised operational job records, structured user input and connected front-end capture workflows to persistent backend data.
- Designed and supported backend data flows for captured records, including SQL queries, validation rules, data corrections, bulk updates and controlled database changes.
- Managed backend exports for operational and management use, preparing clean, structured datasets for reporting, reconciliation, analysis and downstream processing.
- Administered imports, deduplication, field standardisation and data-quality checks to keep production datasets accurate, traceable and usable across business processes.
- Tested and optimised database-driven features and queries for performance, integrity and security while troubleshooting user issues and inconsistent records.
- Prepared recurring extracts, ad-hoc reports and database documentation for stakeholders, translating raw operational data into reliable business-ready outputs.

PERSONAL

Date of Birth
02 December 1995

Gender
Male

Marital Status
Single

DELIVERY STRENGTHS

- Requirements to deployment
- Database-backed workflows
- Production troubleshooting
- Data quality & exports
- API & automation integration
- LMS administration
- Technical documentation

EARLIER EXPERIENCE

Data Analyst | Tusanang Training Academy

July 2022 - March 2023

- Cleaned, analysed and interpreted operational and learner data, producing stakeholder-ready information and identifying trends, inconsistencies and data-quality issues.
- Coordinated projects and maintained learner information across integrated management systems, supporting accurate reporting and administration.

Computer Technician | Gauteng City College

January 2021 - July 2022

- Configured workstations, installed software, maintained computer equipment and diagnosed hardware, software and connectivity issues for staff and students.
- Provided user support and basic system training, helping users adopt software and follow standard technical processes.

IT Technician and Data Analyst | Digni Financial Services / Netis Consulting

August 2020 - December 2020

- Installed and maintained software and network access, connected user devices and analysed Excel-based operational data for reporting and decision support.

Cashier / Administrator | Refresh Laundry & Laundry Enterprise

October 2015 - January 2020

- Managed invoicing, administration, customer queries and day-to-day operational records while supervising staff and supporting service delivery.

SELECTED PROJECTS

MIKS Cubed K53 Learning Portal

Moodle / Edwiser • PHP / MySQL • JavaScript • cPanel

Designed and delivered a structured K53 learning environment with theory modules, quizzes, mock assessments, learner progress logic, certificates and branded navigation. Managed course architecture, hosting/database configuration, learner testing and production rollout.

DriveQuest - Gamified K53 Experience

JavaScript • Gamification • Moodle Integration

Built the practical gamification layer for the K53 programme with interactive road-safety quests, XP, achievements, vehicle-control challenges and scenario-based activities that connect back into the learner journey.

Izala Verificators Group Website

Wix • Responsive UI / UX • Custom Styling

Redesigned the group website to present B-BBEE verification, forensic, trust and actuarial services with clearer information architecture, stronger visual hierarchy, responsive layouts and improved service discovery.

IVFS Forensic Services Website

React • TypeScript • Responsive CSS

Developed a dedicated forensic-services website using reusable React components, responsive layouts and service-focused navigation, taking the interface from design direction through implementation and live deployment.

UIF Verification & Internal Business Systems

PHP • MySQL • JavaScript • APIs • PDF Reporting

Built database-driven verification and case-management workflows with structured forms, autosave, document handling, calculations, audit-friendly reporting and generated PDF outputs for operational use.

NFC Attendance Platform

PHP / MySQL • NFC • Reporting

Developed attendance capture and administration workflows around NFC tap events, including missing tap-in/tap-out handling, learner data management and reporting/export requirements.

KEY ACHIEVEMENTS

- Delivered production systems across verification, training, case-management and public-facing web environments, owning work from data model and interface design through deployment and support.
- Built a gamified K53 learning ecosystem that combines Moodle course delivery with interactive practical challenges, learner progression and branded user journeys.
- Developed database-driven operational systems for structured capture, validation, reporting and backend exports, improving the reliability and usability of business data.
- Built AI/OCR and automation tools that transform unstructured documents and manual processes into structured outputs, reports and connected workflows.
- Delivered responsive React/TypeScript and PHP-based applications alongside production hosting, API integration, database administration and troubleshooting.

PROFESSIONAL STRENGTHS

Problem Solving • Communication • Attention to Detail • Teamwork • Fast Learner • Works Under Pressure
